Images of Onycholysis. Overview. Nail lifting (onycholysis) is the spontaneous separation (detachment) of the fingernail or toenail from the nail bed at the end of the nail (distal) and/or on the sides of the nail (lateral). The appearance of nail lifting may resemble a half-moon, or the free edge of the nail may rise up like a hood.

**Nail Lifting (Onycholysis) in Adults: Condition ...**  
Nail lifting (onycholysis) occurs when a fingernail or toenail separates from its nail bed. As the end of the nail begins to lift away, it may look like a half moon or the free edge can appear like a hood laying over the nail bed, still attached.
